

A Unique Approach

ICC NW is part of the ICC Group which includes an array of turn-key service companies to support every phase of your cidery. We are able to assist you with planning, design and construction through our unique approach to design-built, fit-for-purpose facilities.

Design Brief

We begin your project with a design brief taking time to get to know your business in depth, along with your current and future production goals. The design brief is completed before the engineers even get involved.

Fit-For-Purpose

Next, our team will work with you to design a fit-for-purpose facility, that guarantees the lowest total cost of ownership while being well prepared for future expansions.

Engineering

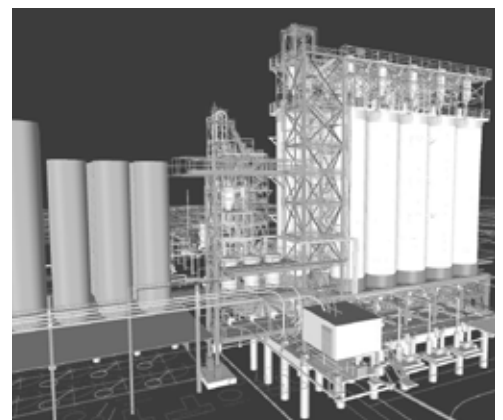

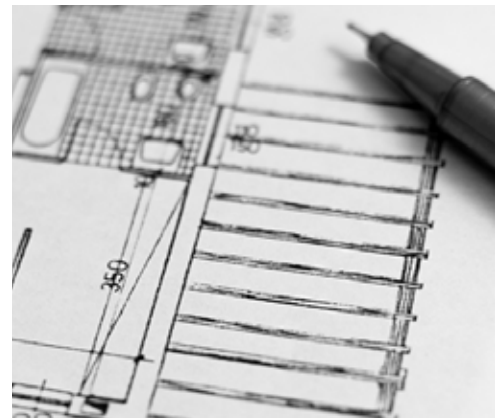

ICC addresses your civil and structural engineering needs through the design-build expertise of three metal building suppliers we work with directly in the construction planning phase.

Automation

With over 20 years experience in Programming and Automation, we guarantee a seamless integration with any control platform. ICC designs and constructs complete control systems to fit any cidery size, capability and budget. Alternately, we also commission commercially available and web-browser based HMI packages.

3D Smart Model

Our Laser Scanning and 3D Modeling approach reduces errors, improves planning and work processes, and identifies design clashes before they become construction delays. Video renderings allow you to walk through your future facility before construction begins.

*ICC Management Team (L-R):
Alex Alexandrov, Anders Hummer, Ryan Coates*

Engineering Lasting Results

With over 30 years of experience we excel in Process Design. Working for clients such as Templeton Rye, Kona Brewing and Vi-Jon, our project engineers understand mission and time critical project delivery.

Manufacturing

With the approved smart model of your facility design, we construct fully assembled parts, vessels and systems; ship them to the construction site and install them in sequence. This approach ensures the project is always on time and budget.

ICC Turnkey

When opting for our Turnkey build services you are guaranteed our highest level of customer satisfaction. We fully commit to the approved contract price and stand behind our work. We keep our promise, so you can keep yours.

How can we help with your engineering needs?
