

Keeping our promises from conception
to operations.

A Unique Approach

The ICC Group Headquartered in St. Louis, MO, is a 34- year old professional provider of full service engineering and design-build services, including automation, Smart 3D design, greenfield construction, and capacity expansion for process-driven industrial clients in the brewing and distilling, chemical, pharmaceutical, FMCG and cannabis industries.

DESIGN BRIEF

We begin your project with a design brief taking time to get to know your business in depth, along with your current and future production goals. The design brief is completed before the engineers even get involved.

ENGINEERING

ICC addresses your civil and structural engineering needs through the design-build expertise of three metal building suppliers we work with directly in the construction planning phase.

3D SMART MODEL

Our Laser Scanning and 3D Modeling approach reduces errors, improves planning and work processes, and identifies design clashes before they become construction delays. Video renderings allow you to walk through your future facility before constructions begins.

FIT-FOR-PURPOSE

Next, our team will work with you to design a fit-for-purpose facility, that guarantees the lowest total cost of ownership while being well prepared for future expansions.

AUTOMATION

With over 20 years' experience in Programming and Automation, we guarantee a seamless integration with any control platform. ICC designs and constructs complete control systems to fit any size, capability and budget. Alternatively, we also commission commercially available and web-browser based HMI packages.

Engineering Lasting Results

“ICC is destined to be...and must be ... a company that continually disrupts perceptions about what is possible and what an engineering company can do. We must not just satisfy our customers, we must astonish them, as well as our competitors. “ – ICC Leadership Team

CONSTRUCTION

With the approved smart model of your facility design, we construct parts, vessels and systems off-site; ship them to the construction site and install them in sequence. This approach ensures the project is always on time and budget.

ICC TURNKEY

When opting for our Turnkey build services you are guaranteed our highest level of customer satisfaction. We fully commit to the approved contract price and stand behind our work. We keep our promise, so you can keep yours.

ICC NW MANUFACTURING

At our 50,000 sqf facility in Canby/OR we custom-make wide varieties of innovative vessels: smart mix tanks with custom agitators, vessels, reactors featuring computerized processing controls, and processing systems. Our tanks can also be designed to meet and manufactured to meet ASME section VIII, 3-A cGMP, and UL specifications as well as any seismic requirements that exist. In addition, we offer piping installations, and retrofitting services for our tanks.

PROJECT EXPERTISE

Turnkey:

Balcones Distillery, Tempelton Rye Distillery, Kona Brewery, Tinley Beverages.

OPEX & Capex Project:

LyondellBasel, Mallinckrodt, 3M, BASF, Westinghouse, ADM, Lonza, MillerCoors, Pfizer, Afton Chemical.

Manufacturing:

Fresenius Cabi, NewLight Technologies, Brewing Systems 7- 50 BBL, Cannabis extraction systems.
